

What to Do with Used Sharps in California

Sharps refer to: needles, syringes, lancets, auto injectors, including epinephrine and insulin pens, infusion sets, and connection needles/sets.

Check www.SafeNeedleDisposal.org for local guidance on sharps disposal in California.

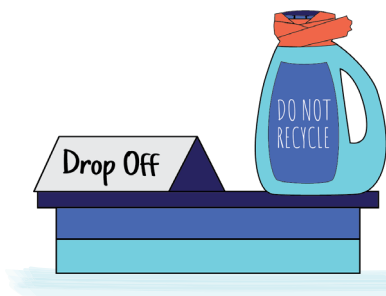

Put used sharps in a strong, plastic container.

When the container is 3/4 full, put the lid on, seal it with duct tape, and label **DO NOT RECYCLE**.

Use the ZIP Code search on www.SafeNeedleDisposal.org to locate container disposal options near you.

Containers of used sharps cannot be placed in the household trash in California.

* Regulations are specific to the state of California.

How you dispose of used sharps safely may be different, depending on where you live. Visit www.SafeNeedleDisposal.org to find regulations on your state.

Container Options for Used Sharps

FDA-Cleared Containers

Strong, Plastic Containers

Used sharps must be placed in a strong, plastic container to be disposed of safely. There are many types of containers available. If you do not have a container made specifically to hold used sharps, a strong, plastic container—like an empty laundry detergent or bleach bottle—may also be used.
